Lecture Information

Discover how microneedling and chemical peels can help reduce acne scars, improve signs of ageing and minimise the appearance of pores. Learn new techniques and foundational concepts of modern facial aesthetics to efficiently and successfully treat your clients.

Date: Monday, 19 September 2022 09H00 – 17h00

Venue: Cosmetique Clinic, Block 22 Unicity Office Park, Riviere Noire Road, Cascavelle

Cost: from Rs3,000

- In-Person Training
- Theory
- Practical
- Certificate upon Completion

Delivered by Biomedical Scientist, Dr. Judey Pretorius

Recognised Training Provider by the South African Association of Health and Skincare Professionals.

Overview

Skin Rejuvenation plays an imperative role in a cosmetic establishment's everyday practice and with all the substantial clinical and technological advances and changes occurring within the discipline, many clinicians and therapists find themselves battling to keep up with these changes in their day-to-day line of work. The paramount focus of this course will be understanding and evaluating chemical peel formulas and ingredients as well as evidence-based microneedling techniques.

Objective

This practical workshop enables clinicians and therapists alike to acquire expertise in preparation and execution of non-surgical facial aesthetic treatments .i.e. chemical peels and microneedling. This practical workshop will empower clinicians and therapists to develop essential skills to carry out the treatments from start to finish. The goal is to acquire knowledge, increase the clinical experience level, or recycle and acquire greater know-how.
